

PRESS RELEASE

SENER participates in the BIND 4.0 programme and joins Industry 4.0

Bilbao, 27 July 2017. SENER extends its commitment to innovation and technology through its participation in BIND 4.0, the public-private startup accelerator programme in the industrial sector, in the field of Industry 4.0. SENER is, in fact, a company of reference in the Aerospace, Infrastructures and Transport, Power, Oil & Gas, and Marine sectors, fields in which the engineering and construction firm is able to assume increasingly complex technological challenges through its extensive international operations.

The initiative led by the Basque Government seeks to attract the talent and innovation of emerging companies from all over the world, in order to bring them into contact with the Basque Country's industrial sector, thus guaranteeing access to first-degree clients. Industry 4.0 is driving the use of new technologies, such as Big Data, digitisation and interconnectivity.

With its collaboration in the BIND 4.0 programme, SENER is taking on the search and investigation for new and innovative technologies and applications for the development of industry 4.0, as well as incorporating talent and technology through selecting and signing up startups in their initial phases that fulfill the profile defined by the company.

About SENER

SENER is a private engineering and technology group founded in 1956. It seeks to offer its clients the most advanced technological solutions and enjoys international recognition thanks to its independence and commitment to innovation and quality. SENER has a workforce of nearly 6,000 professionals at its facilities in Algeria, Argentina, Brazil, Chile, China, Colombia, India, Mexico, Morocco, Poland, Portugal, South Africa, South Korea, Spain, the United Arab Emirates, the United Kingdom, and the United States. The group's turnover exceeds €1.376 billion (2015 data).

SENER engages in the specific activities of Engineering and Construction. It also has industrial holdings in companies involved in Aeronautics, as well as in Energy and Environment. SENER's Engineering and Construction division has become one of the world's benchmark companies in the Aerospace, Infrastructure and Transport, Power, Oil & Gas, and Marine Engineering sectors.

In 2017, SENER will be celebrating 50 years in Space, with over 275 devices and systems successfully delivered for satellites and space vehicles to agencies in the USA (NASA), Europe (ESA), Japan (JAXA) and Russia (Roscosmos).
