

## PRESS RELEASE

# The Committee on the Environment and Climate Change of the Spanish Senate visits SENER

Madrid, April 14, 2015 - SENER's facilities in Madrid (Spain) will be visited on April 14 by the Committee on Environment and Climate Change of the Spanish Senate, led by its President, María Jesús Ruiz Ruiz. The President of SENER, Jorge Sendagorta, and the President of Torresol Energy, Enrique Sendagorta, will receive the delegation and take care of the visitors, being accompanied by the General Manager of Torresol Energy, Álvaro Lorente, and SENER's Power and Process General Manager, Borja Zárraga.

During the meeting, a summary of the Group's activity in Energy and Environment will be presented. In this area, SENER develops projects in the fields of renewable recyclable energies and energy valuation of waste, in which it also has stock options. This has led, over more than a decade, to the creation of new companies characterized by their innovative spirit, such as the solid waste treatment plant [Zabalgarbi](#), in Bilbao (Spain) or [Torresol Energy](#), a company specializing in the promotion and development of pioneering solar concentration power plants, with technology milestones such as [Gemasolar](#), [Valle 1](#) and [Valle 2](#).

A particular focus will be placed on energy valuation of waste, a sector in which SENER has developed reference projects as remarkable as the above-mentioned Zabalgarbi plant or the future Walsall project in the United Kingdom.

The Committee will learn more about the activity of SENER in other areas by visiting the Integration and Test Center, located in the same complex of SENER premises in Madrid, in which the assembly, integration and testing of equipment, mechanisms and subcomponents, especially for aerospace projects, is conducted. In addition, the visitors will attend a demonstration of SENER's FORAN System for marine design and construction, which celebrates its 50 years in 2015, in the virtual reality room situated in the Marine department.

### About SENER

*SENER is a private engineering and technology group founded in 1956. It seeks to offer its clients the most advanced technological solutions and enjoys international recognition thanks to its independence and its commitment to innovation and quality. SENER has a workforce of over 5,700 professionals distributed across its offices in Algeria, Argentina, Brazil, South Korea, Chile, China, Colombia, the United Arab Emirates, Spain, the United States, India, Japan, Mexico, Poland, Portugal and the United Kingdom. The group has a turnover of €1.3 billion (2014 data).*

*SENER engages in the specific activities of Engineering and Construction. It also has industrial holdings in companies involved in Energy and Environment, as well as in Aeronautics. In the area of Engineering and Construction, SENER has become a world leader in Aerospace, Infrastructure and Transport, Power and Process, and Marine.*

*SENER's FORAN System, a CAD/CAM/CAE software for design and production of all kinds of ships and offshore structures, celebrates its 50 years in 2015, half a century of continuous reinvention that makes it the longest available in the market. Today, FORAN is in the state-of-the-art of technology, installed in 30 countries and used in world-renowned programs.*
